DETAILED ACTION

Response to Arguments

Applicant's arguments filed on March 5th, 2005 have been fully considered but they are not persuasive. The applicant argues that Mendenhall fails to disclose a nebulizer out-flow path that is disposed within the conduit configured to communicate with the nebulizer top flow path. The examiner disagrees. Mendenhall does disclose a nebulizer out-flow path that is disposed within the conduit configured to communicate with the nebulizer top flow path **(the out-flow path is referred to as the flow of gas leaving the exhaust valve 8 which is a part of conduit 16 and configured to communicate with the nebulizer top flow path (the top flow path is referred to as the flow of gs going towards the mouthpiece 18))**.

In conclusion claims 1-3, 5 and 7-9 are still rejected under 35 U.S.C. 102(e) as being anticipated by Mendenhall (US 6,772,754) as stated in the previous office action dating back to October 19th, 2004. Claims 12 and 15-22 stand rejected under 35 USC 103(a) as being unpatentable over Mendenhall (US 6,772,754) in view of Walker et al. (US 6,679,250) as stated in the previous office action dating back to October 19th, 2004.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

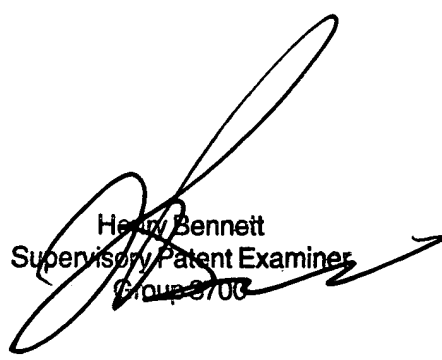

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 3743

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
